REPORT

Tree Plantation Activity

Organizer: NSS Department

Title: Tree Plantation Activity (1st October, 2025)

Objective:

The primary objectives of tree plantation are to improve environmental quality by reducing pollution and enhancing air and water quality. It helps combat climate change by absorbing carbon dioxide and releasing oxygen. Tree planting also prevents soil erosion and supports biodiversity by providing habitat for wildlife. Additionally, it contributes to the beautification of landscapes and supports sustainable livelihoods.

Benefits:

Tree plantation activity in a college offers numerous benefits both environmentally and educationally. It creates a greener and cleaner campus, improving air quality and reducing noise pollution. The activity helps in mitigating the effects of climate change by increasing green cover and absorbing carbon dioxide. It also aids in reducing soil erosion and enhancing groundwater levels.

For students, it fosters a sense of environmental responsibility and awareness. It provides hands-on experience in sustainability practices and encourages teamwork and community participation. Tree plantation can also improve the aesthetic appeal of the campus, creating a peaceful and inspiring environment for learning. Over time, the growing trees offer shade, regulate temperature, and attract birds and beneficial insects, enriching biodiversity. It strengthens the bond between students and nature, promoting long-term ecological thinking.

Overall Report:

On 1st October, 2025, our college organized a tree plantation activity as part of its ongoing commitment to environmental sustainability and awareness. The event aimed to promote ecological balance, enhance the green cover of the campus, and involve students in environmental conservation efforts. Faculty members, students, and staff actively participated in planting a variety of saplings across the college grounds. The initiative not only contributed to a cleaner and greener environment but also served as a practical learning experience. Through this activity, participants were encouraged to take responsibility for nature and understand the vital role trees play in maintaining ecological health.

The event was inaugurated by Principal **Dr. S. S. Mohite**, who highlighted the importance of importance of tree plantation. In his address, he emphasized how trees are helpful to our nature and what we have to do to increase tree plantation activity for better future.

This event was successfully coordinated by **Mr. Abhijit K. Salunkhe**, **Mr. Anis A. Shaikh**, and all NSS department members under the NSS program. The active involvement of all teaching and non-teaching staff, along with students, made the activity a grand success.
